ALF-07

Flybar Frame

DESCRIPTION :

The Ahuja ALF-07 is a flybar frame designed for rigging the ALX-7500 line array loudspeaker system.

FEATURES :

- Installation should be done by an authorised professional only.
- Inspect the flybar, locking pins, brackets and hardware for any damages prior to rigging & suspending the system.
- Usage of brackets, locking pins, flybar and hardware, as supplied with the system, is highly recommended.
- Only competent personnel should be engaged for installation of trusses and flying the line array system.
- Additional safety items like belts, chains etc. should always be used.

SPECIFICATIONS :

Compatible With	ALX-7500 Line Array Loudspeaker

Specifications from the official Ahuja catalogue. Issued for customer reference.
