

SVC S 15000

DESCRIPTION :

The SVC S15000 is a high-endurance professional automatic servo voltage controlled stabilizer for high power loads, specially designed for audio equipment.

Engineered and tested to be India-ready, the stabilizer provides quick, clean, and regulated AC power in environments with unreliable and fluctuating mains supply.

FEATURES :

- 15KVA / 15000W stabilizer specially designed for audio equipment.
- Over and under voltage correction - automatically regulates in both conditions.
- Wide input voltage range for Indian conditions (160-250V).
- Accurate voltage control.
- High Overload Capability.
- Generator compatible design.
- Short circuit protection.
- No waveform distortion.
- Lesser than 1 sec stabilization time.
- Voltmeter displays output voltage - no more 'drop' during bass thumps.
- Digital current and voltage meter display.
- Low-noise operation.
- Robust and sturdy mechanical build quality.
